Business model

Unique Selling Point

Agile and dynamic enterprise with the ability to rapidly adapt to changes in the market.

Mondo TV can rely on experienced professionals with long-time knowledge of the market, capable of reaching potential clients all around the world. Years of experience together with an in house audiovisual pipeline that includes preproduction, animation and postproduction allows Mondo TV to deliver top quality contents. In addition to that, our hubs in the Canary Islands and China and the tax credit/rebate available in Italy, Spain and France drastically reduce the production costs, giving an high profitability for each production

Team Overview

Business Strategy

Commercial plan

The Group expects a positive evolution of its revenues, due to **the differentiation of the business** with respect to the past, in particular, **widening the target of the contents to have more options for sale**. For this reason, the projects now being developed cover **all targets from children to adults** (such as "2050") through teenagers. With reference to distribution, the Group's intention is to **increase the portfolio of third party programs in distribution**, which offer the possibility of having income throughout the year with interesting margins and which do not require investment in production.

*Includes everything from character design to storyboards, for animated series in which the parent company participates as a co-producer or for third parties.

Coproduction

Business development in target territories through:

- The search of **new opportunities** offering products to markets along the territories they operate in.
- A significant **market consolidation** achieved due to a wider range of series offered. In addition to a quest in order to increase profits with an enlargement of the series catalogue with projects working with European partners.
- Looking forward to apply a **coproduction model with pre-sales in order to reduce the risk and self financing**. Considering that RTVE, RAI and all the digital platforms (such as Netflix, Amazon, Disney etc.) are willing to work together in the production of an animated series.

Distribution

Focused on:

- Projecting the series at peak hours in the most popular channels, assuring that way the maximum audience, and therefore facilitating product sales. Key objective for license negotiation as manufacturers want a well-known license, as the audience is their last consumer.
- Maintaining the most territories possible when it comes to distributing the possible territories for projecting the series.
- Mondo TV Italy, with its **International Sales department, provides a strong presence in EMEA and Australasia**. And a Consumer Product department for L&M sales.

Licensing & Merchandising

The Company has as goals:

- **The sale of the master toy** to a manufacturer which ensures the mass-production of base category products (toys, school materials...) in the case of (co)produced series. This will act as the driver of many other categories such as textile, food, etc.
- The **sale of non base category products** like textile or food, which in the end provide the biggest amount of revenues with the series use.
- Launching a **new line of business of series production** addressed to a more adult public that will carry along potential development of L&M. With the difference that it doesn't look to sell the master toy but to sell solely the target's interest areas (usually textiles and gadgets).

Audiovisual Services*

Taking advantage of:

- Production service companies with fiscal residence in the Canary Island, who are in charge of a foreign production, benefit from a refund of 40% of the eligible expenditure in the Canary Islands.
- In the case of national production taking place in the Canary Islands and obtaining the Canary Islands Work Certificate, the deduction percentages are 45 % on the first million euro, and 40 % thereafter.
- **All these incentives make it possible to reduce the Group's tax expense and generate an extra cash flow.**

Team Overview

Mondo, at a glance

Historical Performance

During the 2018, the deterioration of the international economic situation, and the slowdown in the Chinese economy deriving also from the trade war between China and the USA, decreased the investments including media products. That, together with three Asian customers that announced to significantly revise their investments in some productions partly due to difficulties in the exploitation of such programs in their markets, led Mondo TV to impair its library of approximately €31 million and a write-off of its credits of approximately € 27m.

It should be evidenced that the Company's shareholders' equity at December 31, 2018 amounted to Euros 58.2 million with a significantly positive net financial position, which guarantees adequate financial resources to support the business development in future years.

3

Team Overview

Group key financials

The Company is able to generate positive returns with several revenues streams, a revenue-maximizing profile and supported on a strong export component.

Rationale

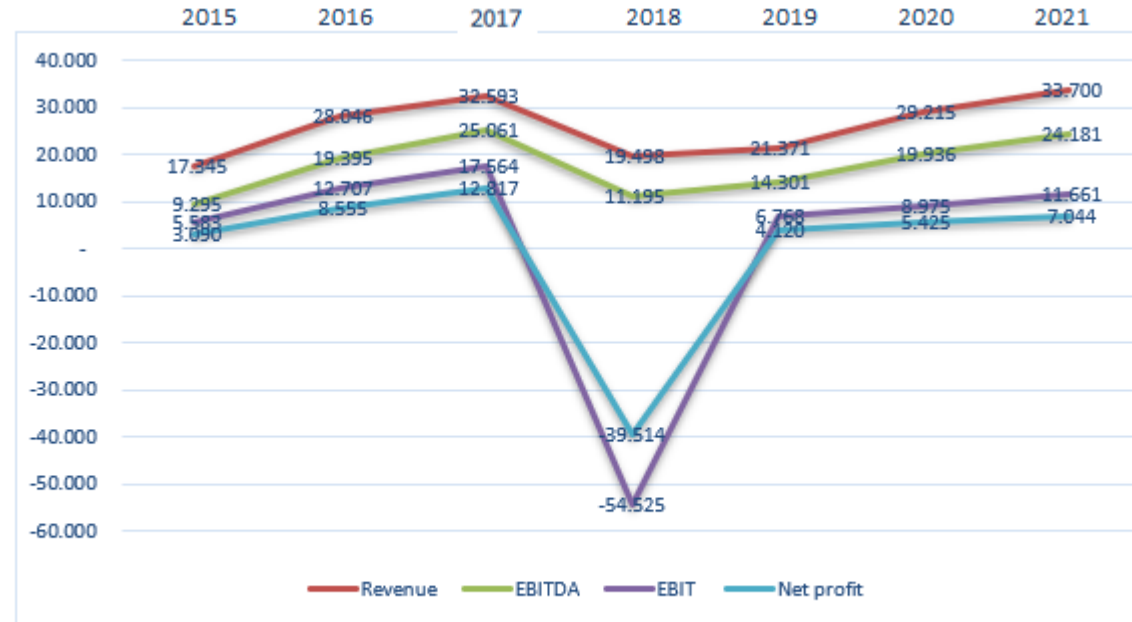

Co-production revenue correspond to Yoohoo to the Rescue, Bat Pat 2, Heidi, 2050, Disco Dragon, Robot Trains, MeteoHeroes etc. The Group is constantly looking for new coproductions.

The distribution segment depends on the agreements and the matching between purchase and sale, and its evolution is not always linear.

The Group has decided to reduce its exposition in China and penetrate new market such as North Europe, US

Although 2018 has been a year that closes with losses, these are not due to a fall in business but to deterioration of some investments and credits

Key Performance Indicators (€000s)

*It does not take into consideration internal capitalizations and other income no related to sales and services

ROE	7,90%	15,44%	17,00%	-68,00%	7,00%	8,3%	9,4%

- Compared to the past years, we want to avoid investing without a clear vision of the future revenue stream. In that sense, we have chosen to produce a pilot and offer it to possible co producers or customers to close pre-sales or to start a coproduction where our risk is lower compared to the past. The market has changed a lot in recent years with the arrival of SVOD platforms, which is why we believe that what will allow us to grow in this segment is the search for projects to co-produce and distribute in Europe.
- Ebitda will increase thanks to the decrease in operating expenses being implemented through the Group starting from 2019.
- Ebit will stay stable due to new amortization coming from the present and future coproductions.
